Bachelor of Information Systems and Technologies • Top of the course for 3 semesters

School — NVP №32, Poltava

In-depth study of mathematical sciences and programming

2012 — 2023

## Experience

Full-Stack Developer — FictAdvisor

2023 — 2025

Kyiv

- User Interface Development:** built responsive and accessible UI using HTML, CSS (SASS/SCSS), and React.js.
- Performance Optimization:** improved load time via best practices and asset optimization.
- Cross-functional Collaboration:** worked with back-end developers and designers to align features with business goals.
- Best Practices:** maintained clean and scalable codebase.
- Testing & Debugging:** ensured compatibility across devices and browsers.

- React
- PostgreSQL
- SCSS
- Nose.js
- Express
- Accessibility
- Performance

Udemy International — Internship

2023 — 2025

Kyiv

- Created and curated educational content with a focus on web development and programming.
- Delivered numerous hands-on projects applying knowledge to real-world tasks.
- Gained experience with React, Node.js, Express, and MongoDB, collaborating with international peers.
- Built strong self-discipline, adaptability, and problem-solving through continuous evaluation.

- React
- Node.js
- Express
- MongoDB
- Git
- Supabase

## Projects & Portfolio

See my non-commercial projects across React, Node/Express, and MongoDB in my portfolio:
